- **Westside, 100 stores:** [Tata's Westside to open 100 stores a year, up from 10-15, backed by \\$260M raise](#)

How the figures are made

Every figure counts rows of the RetailIntel store-openings tracker: one row per reported opening of a physical, consumer-facing location in India (stores, flagships, showrooms, experience centres, cafés and restaurants, dealerships, salons), read by fixed rules from the headline and summary of one dated, source-cited report. No model writes a number.

These are the openings we hold a report for, not every store opened in India. Several reports of one opening are one row. Announced plans are counted apart and never added to openings.

Month = the month the report states, else the month of the source report. A category comes from the report's sector; an opening whose sector no rule reads has none. A mall is named only where the report names one.

Stated numbers (stores added, a plan's target) are printed only where the report's headline writes them, over the period it names. An exit is a headline in which a brand shuts or leaves stores in India; a regulator suspending a licence is not an exit.

The month in progress is an edition to date: its numbers are read every hour and grow as reports arrive. A closed month can still gain a late-filed report.
